1S70004	PID Upgrade RTVGSIPTF Command	10/10/17	
	o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter.		

.
We anticipate that some installations' networks
will have problems accessing the PTF server over
HTTP. On a temporary basis, RTVGSIPTF has
introduced a PROTOCOL() parameter that allows
you to switch back to the old FTP behavior while
correcting problems with HTTP service. This
parameter will ultimately be removed along with
support for FTP as a transport mechanism.
.
COMPATIBILITY WARNING
.
HTTP is now the default protocol for PTF
retrieval. If your network restricts HTTP
access or if a proxy is required for HTTP
access the RTVGSIPTF command will fail. If a
proxy is required you must fill in the
PROXY() parameter. Otherwise you will have to
specify PROTOCOL(*FTP) while you resolve
problems with HTTP access on your network.
