Product ID : 2A55SM2 Gumbo Mail - Gumbo Software, Inc.
 Release : V1R8M0
 As of : 2017/10/10

PTF ID	Description	Status Date	Superseded By
1S80ALL	Cumulative PTF Package Last Updated 2017/10/10		
1S80001	SND Attachment Name With M\$ "\" <ul style="list-style-type: none"> Attachment file name incorrect when object specified using window path separator character ("\\") instead of IFS path separator character ("/"). 	01/17/16	
1S80002	PID Message File Updates <ul style="list-style-type: none"> Add new application messages to message file for future enhancement. 	10/10/17	
1S80003	PID Upgrade RTVGS IPTF Command <ul style="list-style-type: none"> Previously, the Retrieve Gumbo PTF (RTVGS IPTF) command downloaded PTFs using the FTP protocol. Now RTVGS IPTF uses HTTP. Additionally, RTVGS IPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. <p>·</p> <p>We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGS IPTF has introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism.</p> <p>·</p> <p>COMPATIBILITY WARNING</p> <p>·</p> <p>HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGS IPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(*FTP) while you resolve problems with HTTP access on your network.</p> <p>·</p> <p>* * * * *</p>	10/10/17
