

Product ID : 2A55SM2 Gumbo Mail - Gumbo Software, Inc. Page 1
 Release : V1R8M0
 As of : 2018-01-15

<u>PTF ID</u>	<u>Description</u>	<u>Status Date</u>	<u>Superseded By</u>
1S80ALL	Cumulative PTF Package Last Updated 2018/01/15		
1S80001	SND Attachment Name With M\$ "\" <ul style="list-style-type: none"> o Attachment file name incorrect when object specified using window path separator character ("\") instead of IFS path separator character ("/"). 	01/17/16	
1S80002	PID Message File Updates <ul style="list-style-type: none"> o Add new application messages to message file for future enhancement. 	10/10/17	
1S80003	PID Upgrade RTVGSIPTF Command <ul style="list-style-type: none"> o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. <p>.</p> <p>We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGSIPTF has introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism.</p> <p>.</p> <p>COMPATIBILITY WARNING</p> <p>.</p> <p>HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGSIPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(*FTP) while you resolve problems with HTTP access on your network.</p> <p>.</p> <p>* * * * *</p>	10/10/17
