

Current PTF Listing

Page 1

Product ID : 2A55DCR Dicer - Gumbo Software, Inc.
Release : V2R1M0
As of : 2017/10/10

PTF ID	Description	Status Date	Superseded By
2C10ALL	Cumulative PTF Package Last Updated 2017/10/10		
2C10001	PID Message File Updates <ul style="list-style-type: none">o Add new application messages to message file for future enhancement.	10/09/17	
2C10002	PID Upgrade RTVGSIPTF Command <ul style="list-style-type: none">o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. <p>. We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGSIPTF has introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism.</p> <p>. COMPATIBILITY WARNING</p> <p>. HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGSIPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(*FTP) while you resolve problems with HTTP access on your network.</p> <p>. * * * * * E n d O f L i s t * * * * *</p>	10/10/17
